

Your next task for the milestone project 2 is to create the Website for the Hotel Booking service much like MakeMyTrip.

Aim of the task is to get you familiarized with concepts of Web development which include HTML, CSS and Javascript. Make sure to follow the standards and best practices you've learned in the project as code quality is important.

Add necessary validations wherever required. Make the design responsive so that the application is accessible on mobile and tablet devices. You are free to choose the layout for mobile and tablet devices as the figma doesn't have references for the same.

Primary task of the project is to showcase the HTML, CSS and JS skills. Points will be awarded for any tricky layout solved correctly or with right approach with clear justification keeping the above points in mind. If simple exercise is solved using advanced concepts points will be awarded but make sure in doing so you don't lose time and miss completing the project. So choose your battles wisely.

The following Figma comprise of complete desktop UI but you have to work on 3 frames mentioned below. But you can always spare time if you manage to on other frame if time permits.
